SUMMARY

Final-year AI & ML engineering student (CGPA 8.94/10) who ships production-grade AI systems end to end — LLM pipelines on GPT-4o, RAG with ChromaDB, agentic workflows, and FastAPI/React services with CI/CD. Built a clinical decision platform at 91%+ prediction accuracy and ranked top 20 of 100 interns at SmartED Innovations.

CORE SKILLS

Languages: Python, Java, SQL

GenAI / LLMs: GPT-4o, Llama 3.2, Qwen2.5-Coder, RAG, ChromaDB, Agentic workflows, LangChain, LangGraph, OpenAI API, Gemini API

ML / DL: XGBoost, Feature Engineering, TensorFlow, Keras, CNN, Bi-LSTM, Transfer Learning

Computer Vision / NLP: OpenCV, YOLO, DeepFace, FaceNet, HuggingFace Transformers, NLTK, Sentiment & Intent Classification

Backend / Frontend: FastAPI, Node.js, Express.js, REST APIs, WebSockets, React.js, Next.js, TypeScript, Tailwind CSS

Data / Cloud / DevOps: MySQL, PostgreSQL, MongoDB, AWS (Lambda, S3, Textract, Bedrock, DynamoDB), Azure AI, GCP Vertex AI, Docker, GitHub Action.

EXPERIENCE

Machine Learning Intern — SmartED Innovations (Skill India)

Sep 2025 – Jan 2026

- Ranked **top 20 of 100 interns** in an end-to-end ML program spanning supervised, unsupervised, and deep learning techniques.
- Ran data preprocessing, feature engineering, model training, and evaluation for a capstone project in Python and Scikit-learn.
- Built and documented a **real-time facial recognition system** (MTCNN, FaceNet, OpenCV) using cosine-similarity matching.

AI Azure Intern — Microsoft Azure (AICTE – Edunet Foundation)

May 2025 – Jun 2025

- Completed a 4-week program across Azure AI Studio, Azure ML, and Custom Vision.
- Built and deployed an **image classification model** on Azure, applying responsible-AI principles.

Python Programming Intern — VaultofCodes

Aug 2024 – Oct 2024

- Built Python applications using OOP design principles; collaborated on feature development and debugging.

KEY PROJECTS

TruthLens AI — Content Authenticity Verification Platform · GitHub

- Architected a production-grade **FastAPI + React monorepo** integrating GPT-4o to detect and verify online content authenticity in real time.
- Set up pnpm workspaces with strict TypeScript, GitHub Actions CI/CD, multi-stage Dockerfiles, and Nginx reverse proxy for **zero-downtime deployment**.
- Added automated vulnerability and secret scanning (Trivy, TruffleHog) to the CI pipeline, removing manual security review.

Healix — AI-Powered Clinical Decision Intelligence Platform · GitHub

- Architected a 6-module clinical decision support platform on local LLMs (Ollama — Llama 3.2, Qwen2.5-Coder) with FastAPI + React.
- Built a RAG pipeline with ChromaDB and an XGBoost disease-prediction model reaching **91%+ accuracy** across multiple disease categories.
- Shipped a WebSocket-based real-time chatbot with NLP symptom analysis, cutting query response latency.

SamvaadAI — Multilingual AI Assistant for Government Scheme Access · GitHub

- Built an AWS-serverless assistant helping citizens discover welfare schemes via WhatsApp/Telegram in **12+ Indian languages**, by voice or text.
- Designed AWS Lambda microservices with Textract and Bedrock (Claude 3, Titan) for OCR and structured extraction, indexed in DynamoDB.
- Automated ingestion with Python scrapers across 4 scheme sources, consolidated into a unified S3-backed dataset.

EDUCATION

B.Tech, Artificial Intelligence & Machine Learning

2023 – 2027

M.S. Ramaiah University of Applied Sciences, Bengaluru | CGPA: 8.94/10 | Best SGPA: 9.58

CERTIFICATIONS & ACHIEVEMENTS

NPTEL (IIT Kharagpur) – Machine Learning · Google Cloud – Generative AI & Responsible AI · Infosys Springboard – SQL for Data Analytics · Simplilearn – Prompt Engineering · TCS Forage – GenAI Data Analytics

- Top 20 of 100 interns (SmartED Innovations) · Best Semester SGPA: 9.58 · Gold Medalist, College Volleyball · Hackathons: Poonawalla Fincorp National Hackathon, TECH TRIAD 2025, IEEE NEXGEN CONVERGENCE (CMRIT Bengaluru)
